

Net Stable Funding Ratio (NSFR) Disclosure – 31 March 2020

Introduction

The public disclosure relating to Net Stable Funding Ratio (NSFR) has been prepared in accordance with the circular (2BS/356/2015) dated 25 October 2015 issued by Central Bank of Kuwait (CBK) as part of Basel III reforms and complementary to the existing liquidity guidelines.

The main objective of NSFR is to promote more stable and long-term funding sources for asset financing and reduce reliance on less stable, short-term sources of funding.

Definition

The NSFR is defined as the ratio of *Available amount of Stable Funding (ASF)* to *Required amount of Stable Funding (RSF)*.

Available Stable Funding (ASF) is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to one year.

Required Stable Funding (RSF) is defined as the portion of assets and off-balance sheet (OBS) exposures expected to be funded on an ongoing basis over a one-year horizon. The amount of such stable funding required by the bank is a function of the liquidity characteristics and residual maturities of the various assets held by that institution as well as those of its off-balance sheet exposures.

Liquidity Governance

The liquidity governance framework is guided by the Liquidity Policy of the Bank which is reviewed and approved by the Board of Directors. The policy outlines the roles and responsibilities within the Bank with respect to liquidity risk management and provides an overview of the processes including stress testing under various scenarios, for monitoring and managing liquidity risk as per CBK and internal guidelines.

The responsibility for managing liquidity in compliance with internal & external directives rests with Treasury under the oversight of Asset and Liability Committee (ALCO). The liquidity policy also covers the liquidity contingency / crisis planning which specifies the early warning indicators, the roles and responsibilities within the Bank in the event of a liquidity crisis and the actions to be undertaken by each business unit in order to address the crisis.

Funding Strategy

Gulf bank's strategy is to maintain stable and well-diversified sources of funds, with a focus on further raising long-term deposits from consumer banking clients, while continuing to grow and diversify the wider depositor base in order to meet its long-term assets funding requirements, thus maintaining a healthy ratio.

Besides having well established relationships with a variety of domestic, regional and international counterparties that regularly provide long-term funding, the Bank has also been able to obtain long-

term funding from the debt market through the issuance of 10-year KWD 100 million Tier 2 Subordinated Bonds back in May 2016, confirming the Bank's ability to obtain longer-term funding from the Debt Capital Markets if and when required, subject to obtaining the necessary approvals.

The Asset and Liability Committee regularly reviews the macroeconomic indicators and market conditions to provide guidance on liquidity management.
